

CONTENTS

0	Introduction	1
I Generalized Hughes Complexes		
1.	Φ -torsion functor and Φ -transform functor	10
2.	A characterization of generalized Hughes complexes	28
3.	Morphisms between generalized Hughes complexes	42
4.	Generalized Hughes complexes and ring homomorphisms	45
5.	Generalized Hughes complexes and Cousin complexes	51
6.	Comparison of complexes of modules of generalized fraction and generalized Hughes complexes	79
7.	Generalized Hughes complexes and Kersken's denominator systems	104
II Action of certain groups on certain modules and complexes		
8.	Group action and functors	110
9.	Group action on local cohomology modules	117
10.	Group action on Cousin complexes	120
11.	Group action on injective envelops	138
12.	Generalization of 11.13	149
13.	Properties of A^G	159
