Title Page	i
Abstract	iii
Table of Contents	vi
List of Tables	viii
List of Figures	ix
Acknowledgments	x
Dedication	xi
1 Preliminaries	1
1.1 Betti numbers and graded Betti numbers	2
1.2 Hilbert functions and multigraded Hilbert-Poincaré series	5
1.3 Koszul complex and Taylor resolution	9
1.4 Local cohomology and Local Duality	12
1.5 Castelnuovo-Mumford regularity	13
1.6 Stanley-Reisner rings	17
2 Linear resolution of powers of an ideal	19
2.1 Upper bounds on Castelnuovo-Mumford regularity	19
2.2 Rees algebra of an ideal and its bigraded structure	24
2.3 The proof of our criterion for linear resolutions	27
2.4 Examples and applications	31
3 Growth of the Betti sequence of the canonical module	37
3.1 The canonical module and Growth of its Betti sequence	39
3.2 Constructing rings satisfying our conditions	43
3.3 Applications to flat dimension	45
3.4 Further analysis of vanishing of Ext and Tor	49
4 Graded minimal free resolution of ideals	54
4.1 Minimal free resolution of sums of ideals	56
4.2 The graded version	59

4.3	Analysis of a special class of Stanley-Reisner ideals	62
5	Bass numbers of Local Cohomology modules	68
5.1	Finiteness of support and associated primes of local cohomology . . .	69
5.2	Minimax, Artinian and Reflexive local cohomology modules	74
	Bibliography	82
A	Algorithms for our criterion for linear resolutions	87
