1	Introduction	1
1.1	Objectives and conclusions	3
2	Preliminaries	9
2.1	Definitions and basic properties of Local cohomology	9
2.1.1	Ideal transforms	11
2.1.2	Vanishing Theorems	11
2.1.3	Artinian local cohomology modules	12
2.2	Canonical module	13
2.3	Colocalization	15
2.4	Attached primes	17
3	Results on formal local cohomology	21
3.1	Formal Local Cohomology	22
3.2	On Artinianness results	26
3.3	Cosupport	30
3.4	Coassociated primes	35
4	Top local cohomology modules	43
4.1	Ideas around Hartshorne-Lichtenbaum vanishing Theorem	44
4.2	Endomorphism rings of $H_a^{\dim R}(R)$	49
5	Connectedness	53
5.1	Mayer-Vietoris sequence	56
5.2	Connectedness Theorems	56

6	Attached primes and Sharp's asymptotic Theorem	63
6.1	Attached primes of local cohomology	63
6.2	Sharp's Asymptotic Theorem	66
7	Summary and further problems	69
7.1	Formal local cohomology	69
7.2	Top local cohomology	70
