Abstract	5
Acknowledgment	7
Introduction	9
Chapter 1. Preliminaries	15
1.1. Content modules	15
1.2. Locally Nakayama modules	17
Chapter 2. Content algebras	21
2.1. Content and weak content algebras	21
2.2. Prime ideals in content algebras	22
2.3. Content algebras over rings having few zero-divisors	25
2.4. Zero-divisor graph of content algebras	29
2.5. Gaussian and Armendariz algebras	33
2.6. The content algebra $l(R, B)$	34
2.7. Zero-divisors of semigroup modules	36
Chapter 3. Grade of zero-divisor modules	41
3.1. Modules having very few zero-divisors	41
3.2. Some homological properties of ZD-modules	43
Bibliography	49
