reading Daily News

News:

- A new record was set by our opening ceremony. It was only 20 minutes a lot shorter than usual opening ceremonies in Iran. We have to say the bad part too! It was started 21 minutes late! The delay was longer than the program itself!
- We were all glad to learn that not only our President knows about commutative algebra but he does care about it! (We checked!)
- Some say the only thing they noticed in the first day was the out of focus projector! It was a real pain!
- We hope we had enough hints in our last issue for you to discover that the surprise in the social event is Professor Enochs's seventieth birthday (± 4 months). If you didn't get it's not our fault!
- Rumor has it that some of our participants can't be found outside the dining room!
- Lufthansa lost Christensen's luggage! What a shame! The good sign is seeing him with a different shirt, which means he has found his stuff.
- Hooray! I am free to go. I have to let you know that I had to write this news section under the threat of death. The Daily News editor was sitting next to me waiting for me to finish this in less than 30 minutes or kill me! I am safe and sound! ☺

Lets me, check my mail.

Announcement:

- ❖ A good news: now the first and second issue of Daily News are accessible at following URLs:
<http://www.ipm.ac.ir/IPM/news/homological/25.pdf>
<http://www.ipm.ac.ir/IPM/news/homological/26.pdf>
(There are links to all Daily News at the www.ipm.ac.ir main page)
- ❖ There are two photo show, one during break times and second one is just before talks. Miss. Dilmaghani takes and arranges them.

... else Christensen

Answer of yesterday's question: Enochs was born in 1932.

Your comments and suggestions are welcome and appreciated. Please give your comment to the workshop office.

Social Event

Lars, care about your shirt
