## Nullities of Graphs

**R. A. Brualdi**

*University of Wisconsin - Madison  
Wisconsin, USA*

The nullity of a graph  $G$  is the nullity (dimension of the null space) of its adjacency matrix  $A$ , equivalently, the multiplicity of 0 as an eigenvalue of  $A$ . In this partly expository talk we shall review some old and new results about graphs, in particular of trees and unicyclic graphs.
