# Annals of Pure and Applied Logic

journal homepage: [www.elsevier.com/locate/apal](http://www.elsevier.com/locate/apal)

## Contents

### Special Issue

The Proceedings of the IPM 2007 Logic Conference

*A. Enayat and I. Kalantari*

Preface 709

*K. Aehlig and A. Beckmann*

On the computational complexity of cut-reduction 711

*M. Ardešhir and R. Ramezani*

The double negation of the intermediate value theorem 737

*S.M. Bagheri, B. Poizat and M. Pourmahdian*

An arithmetical view to first-order logic 745

*L.D. Beklemishev*

Kripke semantics for provability logic GLP 756

*S. Barry Cooper*

Extending and interpreting Post's programme 775

*F. Didehvar, K. Ghasemloo and M. Pourmahdian*

Effectiveness in RPL, with applications to continuous logic 789

*J. Landes, J.B. Paris and A. Vencovská*

A characterization of the Language Invariant families satisfying Spectrum Exchangeability in Polyadic Inductive Logic 800

*B. Poizat*

Quelques effets pervers de la positivité 812

*J. Väänänen and W. Hodges*

Dependence of variables construed as an atomic formula 817
